4MP 32x Startlight IR WizSense Network PTZ Camera

Launched by Dahua Technology, WizSense is a series of AI products and solutions that adopts independent AI chip and deep learning algorithm. It focuses on human and vehicle with high accuracy, enabling users to fast act on defined targets. Based on Dahua's advanced technologies, WizSense provides intelligent, simple and inclusive products and solutions.

System Overview

Designed with Starlight technology and 1/2.8" CMOS, the camera delivers high-quality monitoring images even in environments with low lighting, and provides back-end applications with round the clock, state-of-the-art data services. It supports a variety of AI functions for improved detection accuracy through its built-in neural network processor and is compatible with solar power supplies, meeting the heavy demands of long working hours.

The camera features behavior detection such as tripwire and intrusion, and multiple types of alarm linkage actions such as white light warning, audio playing and target tracking. To facilitate monitoring and analysis, it also features target filtering, face detection, and foreign object detection, and supports 4G network transmission and waking up from sleep mode.

Functions

Perimeter Protection

Automatically filters out false alarms caused by animals, rustling leaves, bright lights, etc. Enables system to act secondary recognition for the targets. Improves alarm accuracy.

Protection (-10% to +25%, 6 kV)

Designed with -10% to +25% input voltage tolerance, the camera is suitable for even the most unstable outdoor conditions. Its 6 kV lightning rating ensures protection against lightning for both the camera and its structure.

- 1/2.8" 4Megapixel STARVIS™ CMOS
- · 32x optical zoom
- Starlight technology
- · Max. 25/30 fps@4M
- IR distance up to 150 m
- Auto-tracking
- Perimeter protection
- Face detection
- 4G
- · Sound and light alarm
- · Low power consumption

Siren and Light Active Deterrence

The camera supports the white light alarm and voice alarm when perimeter event occurs, to realize the deterrence and effective intervention. The camera is built in the alarm voice, and supports customized voice importing.

Smart H.265+ & Smart H.264+

With advanced scene-adaptive rate control algorithm, Dahua smart encoding technology realizes the higher encoding efficiency than H.265 and H.264, provides high-quality video, and reduces the cost of storage and transmission.

PFA Technology

PFA technology has introduced new methods of judgment that ensure the accuracy and predictability of the direction of subject distance adjustment. The result is a set of advanced focusing algorithms that ensure image clarity when zooming and that shorten focus time. This makes the camera highly advanced in its functions, substantially improving the quality of your experience.
